

MOHAMED MATTER

UI/UX Designer

Abu Dhabi, UAE | mmatter19@gmail.com | +971 50 729 9123 | [LinkedIn](#)

PORTFOLIO: behance.net/mohamedmatter

PROFESSIONAL SUMMARY

I'm a UI/UX Designer with 4+ years of experience across government, AI, fintech, SaaS, healthcare, mobility, and e-commerce products. I'm comfortable owning the full design process: sitting in on client discovery, running UX research, building wireframes and prototypes, and handing clean, well-documented designs to developers. I've built and maintained design systems in Figma using Variables, Components, and Design Tokens, and I'm used to working directly with stakeholders, project managers, and engineers to keep a product's design and its build in sync.

PROFESSIONAL EXPERIENCE

UI/UX Designer | MVP – Application & Game Design

Jun 2022 – Present

Abu Dhabi, UAE

- The only UI/UX designer on the team, so I own each project from the first client conversation through to developer handoff.
- Sit in on discovery calls with clients, turn what they need into user flows and wireframes, then build out the high-fidelity screens myself since there's no separate research or product team to hand this off to.
- Built the Awqaf platform's design system from scratch using Figma Variables, Components, Auto Layout, and Design Tokens, so new screens can be assembled consistently instead of redesigned each time.
- Designed two government platforms, Awqaf and Emirates Red Crescent, both of which came with real accessibility and compliance requirements to design around.
- Handled the Arabi AI interface and the AI Ain Finance app, two very different products that each needed their own approach to building user trust.
- Also designed the InDrive School Driver app, Thamra Offers, and a handful of e-commerce sites for clients including a beauty clinic and a dental clinic.
- Built dashboards for Emirates Red Crescent, Awqaf, a restaurant management platform, and an internal employee management system, all aimed at making dense data easier for staff to work with.
- Stay involved after handoff, reviewing builds against the designs and flagging anything that's drifted before release.

Junior UI/UX Designer | Taqnia Software House

Jan 2021 – Dec 2021

Cairo, Egypt

- Designed web and mobile apps for several client projects, taking each from early wireframes to a working prototype.
- Sat with developers during implementation to answer design questions as they came up, rather than handing off and moving on.
- Cleaned up usability issues on a few existing interfaces by tightening hierarchy and making the visual patterns more consistent.

Junior UI/UX Designer | Muntasher Software House

Apr 2020 – Dec 2020

Cairo, Egypt

- My first design role, working under a senior designer on responsive web and mobile interfaces.
- Put together wireframes and prototypes that helped clients and developers agree on scope before any code was written.
- Learned the basics of developer handoff by sitting in on implementation reviews and seeing how a design actually turns into a working product.

SKILLS

Product Design: End-to-End Product Design, Business Discovery, Requirements Gathering, Client Communication

UX: User Research, User Flows, Journey Mapping, Wireframing, Usability Best Practices

UI: High-Fidelity UI Design, Responsive Design, Mobile App Design, Dashboard Design, Web Design

Design Systems: Figma Variables, Components, Auto Layout, Design Tokens

Collaboration: Developer Handoff, Cross-Functional Collaboration, Stakeholder Management, Agile

Tools: Figma, Adobe Photoshop, Adobe Illustrator, Adobe XD, Sketch

EDUCATION

Bachelor's Degree — Delta Academy for Computer Science and Technology | 2016

LANGUAGES

Arabic — Native | **English** — Professional Working Proficiency | **German** — Basic Proficiency (CEFR A1)
